Education

Indian Institute of Information Technology and Management, Gwalior
B.Tech. in Information Technology

2023 – 2027
CGPA 8.03/10.0

Experience

Machine Learning Research Intern – Time Series Anomaly Detection
IIIT Gwalior (Under Dr. Anjali)

Jan 2026 – Present

- Built **TadGAN-based time-series anomaly detection models** using LSTM, BiLSTM, and Conv1D.
- Improved reconstruction stability and anomaly sensitivity by **~25%**.
- Designed **WGAN-GP critics and anomaly scoring pipelines**.
- Evaluated **5+ model variants** on real/synthetic datasets across **~100-timestep sequences** (GPU).

Technical Skills

- Languages:** C, C++, JavaScript, TypeScript, Java, Solidity, Rust, SQL
- Web Technologies:** React.js, Node.js, Express.js, MongoDB, EJS, Tailwind CSS, Bootstrap
- Blockchain:** Ethereum, Chainlink, Smart Contracts, ZK Proofs, Solana, NFT
- Coursework:** Object-Oriented Programming, Computer Networking, Operating Systems, DBMS, DSA

Projects

A **ZK-powered Decentralized Token Launchpad** | Solidity, Foundry, TypeScript, zk-SNARKs, Circom, React.js, Node.js, MongoDB, Ethereum

GitHub | Link

- Built **VeilPad**, a ZK token launchpad for **1000+ users** using zk-SNARKs and Circom.
- Enabled anonymous contributions via **Merkle trees** and private commitments.
- Deployed **7 smart contracts** for whitelisting, tracking, and distribution.
- Reduced front-running and gas wars by **90%** via on-chain verification; built with React, Node.js, MongoDB.

Resume Autofill Chrome Extension | React.js, Node.js, Express.js, EJS, MongoDB, Chrome Extensions API, JWT

GitHub | Link

- Built a Chrome extension automating resume extraction and autofill, reducing effort by **80%**.
- Developed a secure backend with **JWT-based authentication** and access control.
- Used Chrome Extensions API to enable **40% faster** form submissions.

Arden - A Decentralized Insurance Protocol | Solidity, Foundry, React, TypeScript, Node.js, IPFS, EigenLayer AVS, Ethereum

GitHub | Link

- Built a decentralized insurance protocol with **NFT policies, IPFS metadata, and on-chain payouts**.
- Designed EigenLayer AVS-based claim validation, enabling restaked operators to vote.
- Implemented core **Solidity contracts** using Foundry with a React frontend.

Achievements

- Secured 1st place** in both **Main** and **Arbitrum** tracks of an international **Web3 hackathon** hosted by zkVerify.
- Won the Restaking Infrastructure** track at **Swellcity Buildathon** for **decentralized restaking**.
- Achieved **Overall Winner title** in the **Development Track** of the college-organized Winter Project Hackathon.
- Secured the **Knight** title on **LeetCode** with a peak rating of **1872**.
- Achieved a peak rating of **Pupil (Codeforces)**
- Ranked in **top 50** out of **2300+ students** in the college's GFG coding community.
- Ranked among the **top 1,500** out of **150,000+** participants in **Google's Big Code** coding competition.

Positions of Responsibility

- Core Member, SGM** : Taught coding and core CS concepts to underprivileged school students.
- Campus Ambassador, GeeksforGeeks**: Promoted contests and workshops, increasing registrations **20%**.
