Education

Indian Institute of Information Technology and Management, Gwalior

2023 – 2027

B.Tech. in Information Technology

CGPA: 8.03/10.0

Technical Skills

- **Languages:** C, C++, JavaScript, TypeScript, Java, Solidity, Rust, SQL
- **Web Technologies:** HTML, CSS, React.js, Node.js, Express.js, MongoDB, EJS, Tailwind CSS, Bootstrap
- **Blockchain:** Ethereum, Chainlink, Smart Contracts, ZK Proofs, Solana, NFT
- **Coursework:** Object-Oriented Programming, Computer Networking, Operating Systems, Database Management Systems, Data Structures & Algorithms
- **Coding Profiles:** [LeetCode](#) [Codeforces](#) [GFG](#)

Projects

A ZK-powered Decentralized Token Launchpad | Solidity, Foundry, TypeScript, zk-SNARKs, Circom, React.js, Node.js, MongoDB, Ethereum

[GitHub](#) | [Link](#)

- Developed **VeilPad**, a zero-knowledge launchpad enabling **over 1000 users** to contribute anonymously in ETH-based token sales using zk-SNARKs, Circom, and **Merkle trees**.
- Deployed **7 smart contracts** for whitelisting, contribution tracking, and ZK token distribution logic.
- Prevented front-running and gas wars (**90% risk reduction**) via private commitment schemes and on-chain ZK verification, with a scalable React + Node.js + MongoDB stack.

Resume Autofill Chrome Extension | React.js, Node.js, Express.js, EJS, MongoDB, Chrome Extensions API, JWT authentication

[GitHub](#) | [Link](#)

- Built a Chrome extension **automating resume data extraction** and job autofill, reducing effort by **80%**.
- Developed a secure Node.js/Express backend implementing **JWT-based authentication** and access control.
- Used **Chrome Extensions API** to streamline browser interactions, achieving **40% faster form submissions**.

Arden - A Decentralized Insurance Protocol | Solidity, Foundry, React, TypeScript, Node.js, IPFS, EigenLayer AVS, Ethereum

[GitHub](#) | [Link](#)

- Built a decentralized insurance protocol with **NFT-based policies**, **IPFS-backed metadata**, and automated **on-chain** payouts.
- Designed **EigenLayer AVS-based claim validation**, enabling bonded restaked operators to evaluate and vote on claims on-chain.
- Implemented core **Solidity contracts** (policy, pool, AVS manager) using Foundry, with a React frontend for policies, claims, and validator interaction.

Achievements

- Secured **1st place** in both **Main** and **Arbitrum** tracks of an international **Web3 hackathon** hosted by **zkVerify**.
- Won the **Restaking Infrastructure** track at **Swellcity Buildathon** for **decentralized restaking**.
- Achieved **Overall Winner** title in the **Development Track** of the college-organized Winter Project Hackathon.
- Secured the **Knight** title on **LeetCode** with a peak rating of **1872**.
- Achieved a peak rating of **Pupil (Codeforces)**
- Ranked in **top 50** out of **2300+** students in the college's GFG coding community.
- Ranked among the **top 1,500** out of **150,000+** participants in **Google's Big Code** coding competition.

Positions of Responsibility

- **Core Member**, SGM : Taught coding and core CS concepts to underprivileged school students.
- **Campus Ambassador**, GeeksforGeeks: Promoted contests and workshops, increasing registrations **20%**.
